Supervised Machine Learning: Regression and Classification

Supervised Machine Learning: Regression and Classification

DeepLearning.AI

★★★★★

4.9 (10,554 ratings) |

350K Students Enrolled

WHAT YOU WILL LEARN

✓   Build machine learning models in Python using popular machine learning libraries NumPy & scikit-learn

✓ Build & train supervised machine learning models for prediction & binary classification tasks, including linear regression & logistic regression

SKILLS YOU WILL GAIN

Regularization to Avoid Overfitting   Gradient Descent   Supervised Learning

Linear Regression   Logistic Regression for Classification

Completed by Yuchen Zhao

June 22, 2023

33 hours (approximately)

Grade Achieved: 100%

Yuchen Zhao's account is verified. Coursera certifies their successful completion of Supervised Machine Learning: Regression and Classification
